6.1.0.00 Product portion released into the environment during its use

6.1.0.02* The product mass fraction known to be released from the product into the environment during use is $0\% < X \leq 10\%$.

TRUE

6.1.0.09* The data are available publicly (relates to UID 6.1.0.01-08).

TRUE

6.1.0.10* Fraction of the product known to be released has been designed for compatibility with the environment that it is released into.

TRUE

6.1.0.11* The data are available publicly (relates to UID 6.1.0.10).

TRUE

6.1.0.12* The fraction of product released into the environment has been deducted from the mass fraction from the original manufactured product so that the actual portion of the product that will be available for reuse or recycling after use is known.

TRUE

6.1.0.13* The product is designed to avoid microparticle release that is not compatible with the environment it is released into.

TRUE

6.1.0.14* The data are available publicly (relates to UID 6.1.0.13).

TRUE

6.1.0.15* List of parts likely to have wear and tear resulting in a release into the environment is available publicly.

TRUE

6.2.0.00 Dismantling

6.2.1.01 The product has the ability to be dismantled.

TRUE

6.2.1.09 Fraction of dismantlable components that can be either reused or recycled is $99\% < X \leq 100\%$.

TRUE

6.2.1.10 The data are available publicly (relates to UID 6.2.1.02-09).

TRUE

6.2.1.11 Availability of dismantling instructions.

TRUE

6.2.1.12 The data are available publicly (relates to UID 6.2.1.11).

TRUE

6.3.0.00 Remanufacturing

6.3.1.01 The product has the ability to be remanufactured.

TRUE

6.3.1.02 The data are available publicly (relates to UID 6.3.1.01).

TRUE

6.3.1.03 Product traceability is maintained even if identifying marks are lost during use before remanufacturing or during remanufacturing itself.
